

CIRCULAR ECONOMY MONTH

OCTOBER 2024

IMAGINE A WORLD WHERE OUR THINGS LAST LONGER...

In a circular economy, our things use fewer resources, and can be repaired, reused, repurposed, recycled, and deconstructed into their original parts. With a circular economy, we move away from a linear "take-make-waste" approach towards a more affordable, less cluttered, richly biodiverse world - a world where communities are tight-knit, supportive, and encouraged to share.

Join the Thames Region Ecological Association (TREA) and the Institute for Community Sustainability (ICS) to celebrate Circular Economy Month this October 2024. Will you take action towards a sustainable future?
